Feedback mechanism on  
Institutional Governance/faculty  
Performance

Grievance redressal mechanism for faculty, staff and students

#### NORMS FOR GOOD GOVERNANCE

1. **Simplicity:** The mechanism designed for good governance needs to be simple and acceptable to the larger society to facilitate dynamic participation of each party for the furtherance and achievement of predetermined goals.
2. **Efficiency:** Proper delegation of authority coupled with proper motivation helps discharge the shouldered responsibility in spite of limitations faced due to various input variables, thus enhancing quality of results and efficiency.
3. **Flexibility:** High level of educational ambience to be maintained with sufficient room for accommodating novel methodologies in the interest of achieving the joint goals set.
4. **Line of authority:** Clarifies the expectations or contributions to be made by team members and what relationships one needs to maintain at the office level. This gets the job done with desired results within the framework of various constraints; thus enhancing effectiveness.
5. **Job satisfaction:** Relatedness among tasks, responsibilities, and personnel working confers a place of status leading to job satisfaction and stability. Stable inputs produce consistent results.
6. **Continuous Development:** Feedback mechanisms in place for grievance redressal provide opportunity for incorporating corrective measures through human resource motivation; leading to continuous development of the individual as well as the institution.
